## **DETAILED ACTION**

### ***Information Disclosure Statement***

The listing of references in the specification is not a proper information disclosure statement. 37 CFR 1.98(b) requires a list of all patents, publications, or other information submitted for consideration by the Office, and MPEP § 609.04(a) states, "the list may not be incorporated into the specification but must be submitted in a separate paper." Therefore, unless the references have been cited by the examiner on form PTO-892, they have not been considered.

### ***Claim Rejections - 35 USC § 112***

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claims 10 and 26-30 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention. Claim 10 recites "the eye mounted thereon". This limitation lacks antecedent basis, as claim 9 does not explicitly recite an eye. In claim 26, line 5, the phrase "providing at least one molded eye mounting area on the sculpture, comprising..." is indefinite because it is unclear whether "comprising" in this case refers back to "eye mounting area" or "sculpture". Clarification is requested.

### ***Allowable Subject Matter***

Claims 9, 11, 12 and 15-22 are allowed.

Claims 10 and 26-30 would be allowable if rewritten or amended to overcome the rejection(s) under 35 U.S.C. 112, 2nd paragraph, set forth in this Office action.

The following is a statement of reasons for the indication of allowable subject matter: The prior art fails to disclose or suggest a device having all of the claimed limitations. While references such as Powell and Rinehart disclose sculptures with eye sockets and artificial eyes whereby placement of the eye correctly orients the eye within the socket, by various means such as the groove 12 and protrusion 22 of Powell, there is no disclosure or suggestion of such a device where upper and lower eyelids are provided in the eye mounting area, above and below the upper and lower surfaces of the eye socket. This feature has the advantages of enhanced realism of the device, and providing reference for placement of the skin, as discussed on page 10 of the specification. References such as Powell and Maddox, on the other hand, teach eye mounting means where the eyelid portions are included with the eye, rather than the eye mounting area. Because there is no motivation or suggestion to modify the teachings of these references without the use of impermissible hindsight, the claims contain allowable subject matter.

### ***Conclusion***

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Powell, Maddocks, Lennard, Thompson, Johnson, Secrist and Rinehart disclose various sculptures comprising eye mounting areas.
